MT STUDIO PORTED TO IBM eSERVER xSERIES & iSERIES

MT technical staff spent four days at the Solution Partnership Centre, at IBM's software development laboratory in Hursley, Winchester last week, porting MT Studio to the IBM's hardware and software platform. MT Studio has now been tested using WebSphere and DB2 on IBM's xSeries and iSeries hardware platform.

Hosein Rad, Mart Technology's technical director said "We were extremely impressed by the professionalism of the staff at Hursley. We were able to port MT Studio to WebSphere more quickly than expected. Best of all we were excited by the enhanced performance of MT Studio in the IBM environment"

Subsequent tests are planned on the pSeries and zSeries.

Ends
